

Dismantle & Disposal Project Samples

LVE has partnered with marine services company R. J. MacIsaac for engineering support on various dismantle, disposal, and recycling projects. To assist in these projects, LVE has completed towing assessments and various structural engineering tasks through the use of finite element analysis (FEA). Projects within this scope include;

Deep Panuke, offshore platform

MV Holliday Island, passenger ferry

CCGS Hudson, coast guard vessel

Atlantic Shark, cargo barge

HMCS Navy Vessels; Cormorant, Protecteur, Algonquin, and Iroquois

MV Miner, bulk carrier (laker)
